Insulating pad between the fuel pump and the cylinder block on 505 XNA SWITZERLAND/SWEDEN models and the J5

From the following serial numbers:

- . 505 1 631 671
- . J5 0 144 629

XNA SWITZERLAND/SWEDEN, XM7T and XNIT engines are fitted with an insulating pad between the fuel pump and the cylinder block to prevent "vapourlock" occurring.

The fitting of this insulating pad has involved:

- fitting a specific fuel pump plunger 63,5 mm long instead of 48,75 mm long.
- replacing the 2 bolts, M8 x 125, 23 mm long, by 2 bolts M8 x 125, 40 mm long.
- the fitting of a second fuel pump gasket to the cylinder block.
