

10 – WHEELS AND TYRES

PIRELLI 195/60 HR 15 TUBELESS tyres

These TUBELESS tyres fitted as standard to a certain proportion of the 505 production, are designed to be used **WITHOUT AN INNER TUBE**.

The same applies to MICHELIN TRX "190/65 HR 390 and 180/65 HR 390" tyres.

For these versions, and for **any other TUBELESS tyres in series 65 or less**, there are no inner tubes in sizes that can be fitted as an emergency repair.

Should one of these tyres ever be punctured, therefore, it must be repaired. **No other method is to be applied, even temporarily** (see 604 workshop manual).
